1. Product Introduction of DIY Acoustic Treatment

DIY acoustic treatment is getting popular recently. People like to make the acoustic treatment by themselves. And polyester fiber panel is a good material for DIY.

Polyester fiber panel is made of non-combustible, microporous treated special polyester fiber. There are a variety of colors and patterns of decorative cloth to choose from. As an acoustic material that has been widely used all over the world, it Proven to have excellent sound absorption properties.

www.qdbossacoustic.com

The appearance is beautiful and generous, and there is no lack of warm and elegant feeling. This product can not only reduce the noise, but also make the reverberation time reach the acoustic design standard, $NRC > 0.8$, the acoustic adjustment is convenient, and it can provide users with the best acoustic solution. In addition to acoustic requirements, every indoor space has its own specific artistic pursuit. The choice of polyester fiber sound-absorbing board finishes is rich and colorful, which can be formulated according to the individual requirements of users, providing the greatest possibility for achieving your goals. Make the environmental sound quality fuller, clearer and richer in three-dimensional.

2 .Applications of DIY Acoustic Treatment

The polyester fiber panel is widely used in the following areas: Cinema, theater, healthcare center, shopping malls, clubs, education room, stadium, home decoration, office, baffle, home theater, meeting room. It can provide a safe, quite and delightful environment for the people inside.

3. The Advantage of Qdboss Acoustic DIY Acoustic Treatment

Qdboss Acoustic has the patent technology to make the polyester fiber panel flame retardant during production. That's to say, our panel is flame retardant after production. The performance is as good as the panel made of FR fibers, while the cost is half. Unlike the old socking method, we can arrange the shipment as soon as the production. More environment friends, no smell, not sticker or wet on the surface.

4. Qualification of DIY Acoustic Treatment

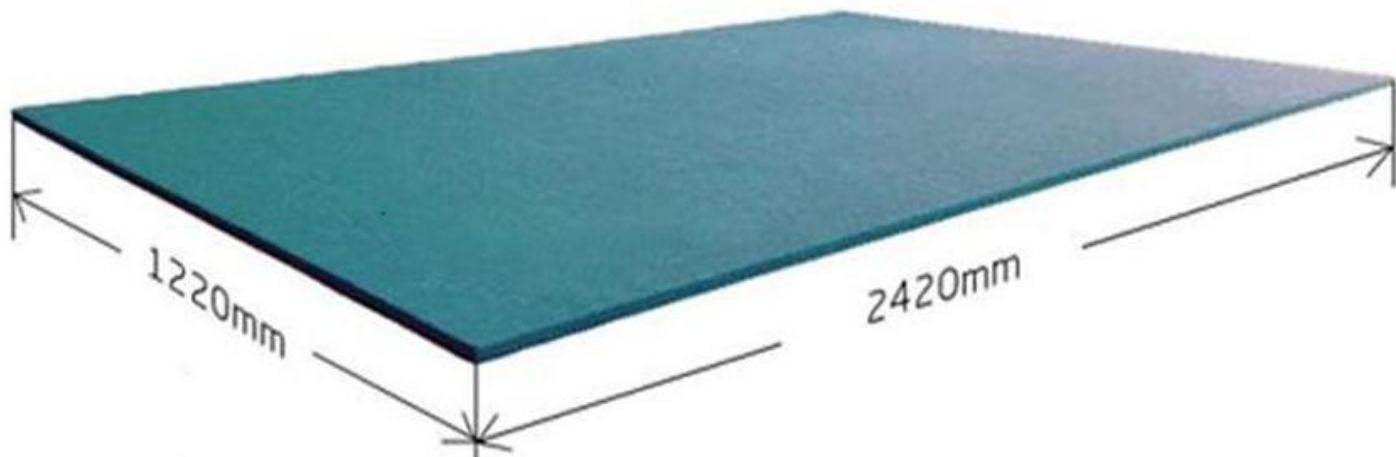

We have 7 modern workshops and production line, with patent technology to make the stable products. Qdboss produces flame retardant DIY Acoustic Treatment, fabric wrapped fiberglass acoustic panel, fiberglass acoustic ceiling.

5. Delivery and Shipping Service of DIY Acoustic Treatment

Qdboss DIY Acoustic Treatment is packed in durable cartons, it is safe to be shipped by truck, sea and plane. Qdboss factory is located in the Jiaozhou, Qingdao, only one hour drive to the famous Qingdao Port and Qingdao Jiaodong International Airport. It can save the domestic shipping cost and provide fast and convenient delivery

6. Further processing of the DIY Acoustic Treatment

The finished panel is 2420*1220mm, rectangle shape. We have the blade cutting station and laser cutting machine. And the panel can be cut to different sizes such as 1200x1200, 1200x600, 600x600, 300x300, or in round, hexagon shape, or any irregular shapes.

The four edges can be beveled, the connecting parts looks more natural on the wall in this way.

The white color can also be printed with patterns or pictures, to make it more decorative.

7 Packing of DIY Acoustic Treatment

We have standard carton packing for the full size polyester fiber panel (1220x2420*9mm), 10 pieces per carton, and the carton size is 2450x1250x105mm. Custom size cartons can also be made according to the sizes required by the client. And non-fumigation pallet can also be used upon request

8 Loading Quantity of DIY Acoustic Treatment
