A: Yes, with certain quantity, we can do any color as required

Q: Can we order various shapes?

A: Yes, we have the cutting station and laser cutting machine, so we can cut the fabric or panel to any sizes or shape within its max. Size.

5 How do the fireproof wall lining work?

The common carpet is not flame retardant, we can make it flame retardant by some further process, such as soaking in chemicals, FR yarn, and carbon coating. In practice, activated-carbon coating is the most advisable choice. The main component is graphite, which is flame-retardant. Graphene is a key national support project. The expansion rate of graphite is 300, which can expand instantly when exposed to high temperatures, preventing oxygen from contacting textiles, smoking and reducing smoke density. Carbonized in fire, no dripping, environmentally friendly flame retardant product Activated carbon coating foaming machine, uniform coating, and good air permeability, impervious to glue

6 Why Choose Qdboss Acoustic Fireproof wall lining
