## **6 How to Install Round Polyester Acoustic Panel**

1. Before construction, you need to pay attention to the problem of board selection and layout, and you need to pay special attention to the slight color difference. On the side of the paste, find the center and draw the cross line, and the way of scheduling is Similar to the way of laying bricks. However, it should be noted that during the entire process, you need to wear gloves for construction to avoid pollution.

2. When cutting the board, a steel ruler and a utility knife are usually used to better cut and modify the board. If it is necessary to reduce the seam, the blade needs to be inclined by 0.5~1mm, which can effectively reduce the gap.

3. When pasting, you can use white latex or non-intrinsic all-purpose glue, so that it can stick to the cement or wood base more effectively, and it will take longer to use
