

### **Printed Acoustic Panel**

Printed Acoustic Panel is synthesized by high temperature and high pressure by needle punching processing, and the porosity is above 90%.

### **Low Price Printed Acoustic Panel Made in China**

To create far more benefit for customers is our company philosophy; customer growing is our working chaise for ODM Manufacturer China Printed Acoustic Panel, We warmly welcome merchants from home and overseas to connect with us and create organization romance with us, and we'll do our greatest to serve you. ODM Manufacturer China Acoustic Panel, Acoustic Board, Abiding by our motto of "Hold well the quality and services, Customers Satisfaction", So we provide our clients with high quality products and solutions and excellent service. Remember to feel free to contact us for further information.

#### **1.Introduction of Polyester fiber acoustic panel**

Polyester fiber acoustic panel is synthesized by high temperature and high pressure by needle punching processing, and the porosity is above 90%. We also have patent technique for permanent fire retardant with our acoustic panels. There are more than 44 colors for you to select. You can also cut the acoustic board into any shape as your requirements.

Our Polyester fiber acoustic panel can be used in many public places like cinema, theaters, multi-purpose hall, gymnasium, dance halls, auditorium etc. Polyester Acoustic Panel is ideal to provide a practical and felt like design solution for any wall situation. It provides not only a colorful felt like finish but also has strong acoustic benefits as well.

Polyester Acoustic Panel is about one third the weight of MDF or plasterboard in equivalent sizes. It is a face finished product, pin-able, slim and is can be used as double sided or single sided panel,

giving it the desirable benefits of fitting into slim-line framing systems and requiring less bulk in coping with its light weight.

Due to it being a finished surface in itself, Echo Panel reduces costs in labor and materials in many applications, including workstations and wall panel.

## 2. Specification Of Polyester fiber acoustic panel

Product Name	Printed Acoustic Panel
Material	100% Polyester Fiber
Density	200kg/m <sup>3</sup>
Weight	1.8kg/m <sup>3</sup>
Size	1220*2420mm
Thickness	3mm - 15mm or customized thickness
Flame retardant (CNS)	B1
FSI	Class A
NRC	0.85-0.95
ECO Grade	E1
Certificates	American CA117, British BS5852, Australian AS1530, CE
Colors	More than 44 colors available or customized colors

## 3. PRODUCT APPLICATION
